WARMUP

You may not use artificial intelligence to answer the questions below.

2.
 - a. `.navbar-toggler` is used to display the collapse button on small screens, `.collapse` wraps the navigation content that needs to be collapsed; right-aligned navigation items need to be added to ``. `.ms-auto`.
 - b. We can use button size options including `.btn-lg` (large), default size and `.btn-sm` (small)
 - c. We can control the border with `.border`, and block buttons use `.d-grid + .w-100` to occupy the full width of the parent container.
